**Encouraging readers to explore nature
and care for the environment**

Celebrating nature since 1983

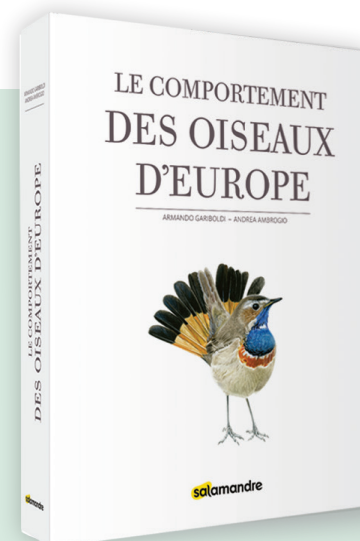

Books on animals, plants and nature to discover, act and share.

As nature enthusiasts, we invite our readers:

- to nurture their curiosity and their love of the natural world with the help of identification guides
- to marvel at the splendours of nature through photography books
- to actively encourage biodiversity with the help of practical guides
- to pass on universal values to the younger generation in a fun way with activity books
- to be inspired by nature with enthralling essays

The Behaviour of European Birds

By Armando Gariboldi and Andrea Ambrogio

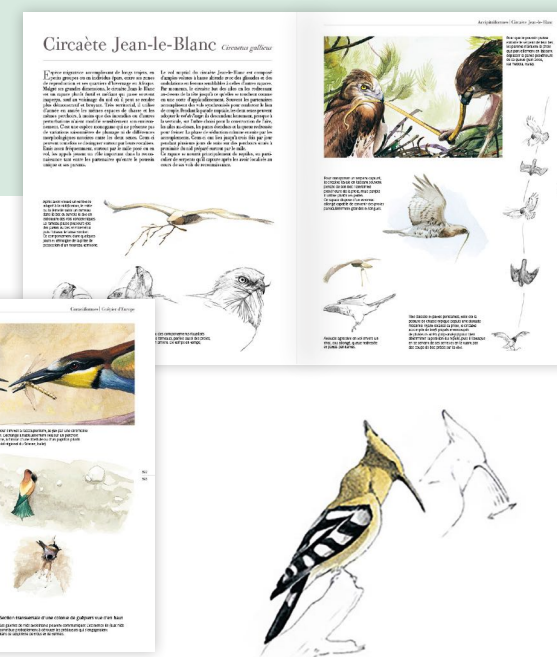

A beautifully illustrated reference work!

Unique in giving a European panorama, this book took three years to research. A study of the behaviours of all the birds in Europe, it comprises:

- **164 chapters covering 427 species:** ducks, swans, geese, birds of prey, waders, gulls, seagulls, passerines...
- **1800 original illustrations,** mostly made in the field or based on video sequences for rare species or particular behaviours.

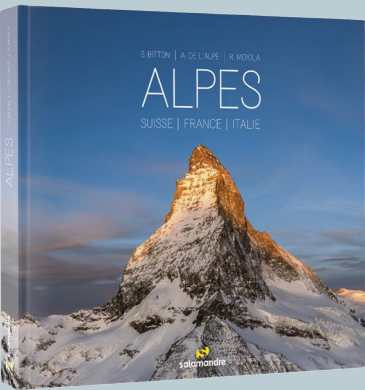

The Behaviour of European Birds is the most comprehensive illustrated treatise on bird behaviour to date. This monumental compendium is an essential companion to the identification guides. Once the bird has been identified, this work helps us understand and contextualise its behaviour by entering into its life. Each chapter details the behaviours by species or group of related species.

The Alps
*By Samuel Bitton, Ambre de l'Alpe
and Roberto Moiola*

The last remaining wilderness in the heart of Europe, the Alps are a watershed spanning countries and cultures, exerting an eternal fascination. This illustrated book cuts across borders to turn the spotlight on this storied mountain range through the eyes of three photographers who specialise in taking pictures from the sky. Through different thematic lenses, geographers, climatologists, glaciologists, geomorphologists and other scientists reveal the mysteries of the Alpine world. This spectacular book will take your breath away!

Once Upon a Time There was Night
By Carole Reboul

These days, who is still lucky enough to gaze at a star-studded sky? Galloping urbanisation and artificial lighting are eroding the night sky. Carole Reboul is a photographer who combines a highly artistic approach with a mission to combat light pollution. With this book, she celebrates the beauty of the night sky.

The "Photo Diaries" series

The "Photo Diaries" series is a collection of photography books under the editorship of Alessandro Staehli. In each book a dedicated photographer and/or naturalist opens up their field notebook to explain how they go about their research in the wild and tell extraordinary tales of their experiences. The books in the beautiful "Photo Diaries" series have "Photo Responsible" (sustainable photography) accreditation, certifying their compliance with the Salamandre Image Charter for nature photography that respects wildlife and the environment.

The Butterfly Effect

By Ghislain Simard and Vincent Albouy

Butterflies are wonderful flying machines capable of unimaginable feats. These ace pilots travel thousands of miles, survive the winter or live on the wing for days without food. *The Butterfly Effect* shows butterflies as you've never seen them before, thanks to remarkable images snapped in flight by leading high-speed photographer, Ghislain Simard and the insights of Vincent Albouy, a renowned expert on these astonishing insects. A unique book that will open our eyes and enhance our awareness of these brilliant creatures.

The “How to live a good life in the 21st century” series

The “How to live a good life in the 21st century” series proposes to find new sources of inspiration in nature for the questions of everyday life. In its great diversity, nature is full of unexpected solutions. Each essay draws on the natural and human sciences to address important needs in our lives. Each chapter begins with an In Nature section, which explores the issue through animal examples. It ends with a section In the human world, which looks at how we humans can explore new ways forward.

Nature Study why and how to reconnect with the living world

By Anne-Sophie Novel

We're always being invited to reconnect with nature, but what does this mean in practice and how can we do so? Inspired by her own realisation, journalist Anne-Sophie Novel carried out a year-long study among people rediscovering nature. She shares the findings of her fascinating investigation, along with first-hand accounts and experiences that encourage us to rethink our relationship with nature, the meaning of our lives and the restrictions of our current lifestyle.

The “Nature Crib Sheets” series

Children ask us lots of difficult questions which can be challenging for parents, grandparents and even for teachers and nature guides to answer. The fascinating series “Nature Crib Sheets” gives adults the keys to answering children’s questions. Each volume contains some 50 expert replies on a nature-related topic close to where you live. Each spread gives the answers to tricky questions while providing unusual nuggets of information, an amazing detail or an unexpected contrast at a deeper level. The illustrations add a sparkle, a wink or a witty riposte to the information presented.
